

SHIVANI NAIR

BACKEND SOFTWARE DEVELOPER

7744838772 | shivani.nair1201@gmail.com | Porvorim, Goa | [linkedin.com/in/shivaninair12](https://www.linkedin.com/in/shivaninair12)

Backend Developer with 2 years hands-on experience in developing RESTful APIs and backend services using Node.js, Express.js, and PHP. Skilled in database management, authentication systems, payment gateway integration, and cloud storage solutions. Experienced in working with production systems and building secure, scalable, and maintainable applications with a strong focus on performance and clean code.

TECHNICAL SKILLS

- Languages: PHP, JavaScript, Python
- Backend Technologies: Node.js, Express.js, RESTful APIs, MVC Architecture, JWT Authentication, API Security
- Databases: MySQL, PostgreSQL, MongoDB
- Cloud & DevOps: AWS S3, DigitalOcean Spaces, Docker, CI/CD, GitHub Actions
- Tools & Technologies: Git, Postman, Google Apps Script, Payment Gateway Integration, Cron Jobs

PROFESSIONAL EXPERIENCE

Software Developer, Team Inertia Technology

Sept 2024 - Present

- Architected and shipped RESTful APIs for 6+ web/mobile products using PHP and Node.js (Express.js) under MVC architecture, serving active production users.
- Cut deployment friction by implementing CI/CD pipelines (GitHub Actions + Docker), reducing manual release steps and improving release confidence.
- Secured all API endpoints with JWT-based auth middleware, handling authentication and role-based authorization across services.
- Integrated payment gateway workflows (success/failure handling) and automated email, SMS, and cron-based notification pipelines, reducing manual follow-up overhead.
- Migrated and optimized MySQL schemas and query logic, improving query response times on high-traffic endpoints.
- Built cloud file storage modules using AWS S3 and DigitalOcean Spaces; debugged and resolved production incidents to maintain uptime.
- Automated email, SMS, and cron-based notification systems.
- Debugged and resolved production issues to improve application stability and performance

Software Developer Intern, Reputes Business Solutions

Apr 2024 - Jul 2024

- Developed a Golf Tournament Management System using Google Apps Script and Google Sheets.
- Automated player grouping, score calculation, and data management workflows.
- Reduced manual effort by approximately 70% through process automation.
- Built real-time reports and dashboards for tournament tracking and analysis.

PROJECTS

Enterprise Transport Management System

Tech Stack: PHP, MySQL

- Built backend APIs for staff and fleet transport operations.
- Developed modules for transport requests, trip allocation, and route management.
- Implemented QR/scan-based attendance and tracking functionalities.
- Developed backend logic for transport operations and process automation.

Ticketing Management System

Tech Stack: PHP, MySQL

- Developed backend APIs for visitor and ticket management workflows.
- Implemented group-based ticket creation and entry management features.
- Built scan/check-in workflows for counter-based ticket validation.
- Designed backend services for secure and efficient ticket processing.

Wellness & Period Tracking Application

Tech Stack: Node.js, MySQL

- Built backend modules for period tracking and health-related features.
- Developed APIs for expert consultation and user management.
- Designed database structure for secure and scalable data handling.
- Implemented backend services for tracking and automated notifications.

EDUCATION

Master of Computer Applications (MCA)

Feb 2023 - Jul 2024

Visvesvaraya Technological University, KLS Gogte Institute of Technology, Belagavi, Karnataka

- CGPA: 8.69

Bachelor of Computer Applications (BCA)

Jun 2019 - Oct 2022

Goa University, Don Bosco College

- CGPA: 9.56

CERTIFICATIONS & AWARDS

- Participated in PwC Launchpad Program (2023).
- Awarded Best Student in Academics – BCA Department, Don Bosco College (2022).
